 REVISED FILING

2007 JUL 10 PM 12:23

STATEMENT OF WATER DIVERSION AND USE

(This is not a Water Right)

This Statement should be typewritten or legibly written in ink and submitted to the address above.
 A separate statement should be filed for each point of diversion. A duplicate copy will be returned for your file.

- A. Name of person diverting water Bureau of Land Management
 Address 355 Hemsted Dr
Redding CA 96002 Telephone: (530) 224-2100
- B. Water is used under: Riparian claim; _____ Pre-1914 right; Other (explain) _____
- C. Name of the body of water at the point of diversion Battle Creek
 Tributary to Sacramento River
- D. Point of diversion is located within Tehama County on Assessors Parcel # 9-050-01, being within the SW 1/4 of NW 1/4 of Section 6, of Township 29W, Range 2W, MD B&M.
 Name of works Battle Creek Ditch
- E. Do you own the land at the point of diversion? Yes NO The name and address of the owner of the land is: _____
- F. Capacity of diversion works 50 (cfs, gpm, or gpd) Capacity of storage tanks or reservoir N/A (gallons or acre-feet)
 Type of diversion facility: Gravity Pump _____
 Method of measurement: Weir Flume _____ Electric Meter _____ Estimate _____
- G. Enter the amount (or approximate amount) of water used each month.
 Amounts below are shown in: Gallons _____ Acre-feet Other _____

| Year | Jan | Feb | Mar | Apr | May | June | July | Aug | Sept | Oct | Nov | Dec | Total Annual |
|------|-----|-----|-----|-----|-----|------|------|-----|------|-----|-----|-----|--------------|
| | | | | | | | | | 180 | 180 | | | 360 |

- H. Annual water use in recent years: Maximum 360 (gallons or acre-feet) Minimum 360 (gallons or acre-feet)
 Year of first use (nearly as known) 1913. BLM began use in 1996
- I. Purpose of use: What is the water being used for: (example, number of acres and type of crop irrigated, average number of persons served, number of stock watered, etc.)
Historic: pasture irrigation, livestock water.
Current: irrigation of restoration activities, wildlife habitat.
Future: Flooding of water fowl ponds at Sacramento Natl. Wildlife Refuge.
- J. General description or location of place of use (example: 40 acres of pasture located 3 miles from Happyville on Alpha Road)
Historic/Current: pasture adjacent to Battle Creek, S/2 Sec 1 T. 29N. R3W MD1
Future: Sacramento River National Wildlife Refuge.
- K. Map: Please locate the point of diversion and place of use on a print of a USGS quad map, or make a sketch on the section grid provided on the reverse side of this form. The sketch should identify the section lines, prominent local landmarks and roads, your point of diversion, and your place of use (your house, acreage irrigated, etc.).
- L. Please answer only those questions below which are applicable to your project.

Additional copies of this form and water right information can be obtained at www.waterrights.ca.gov.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

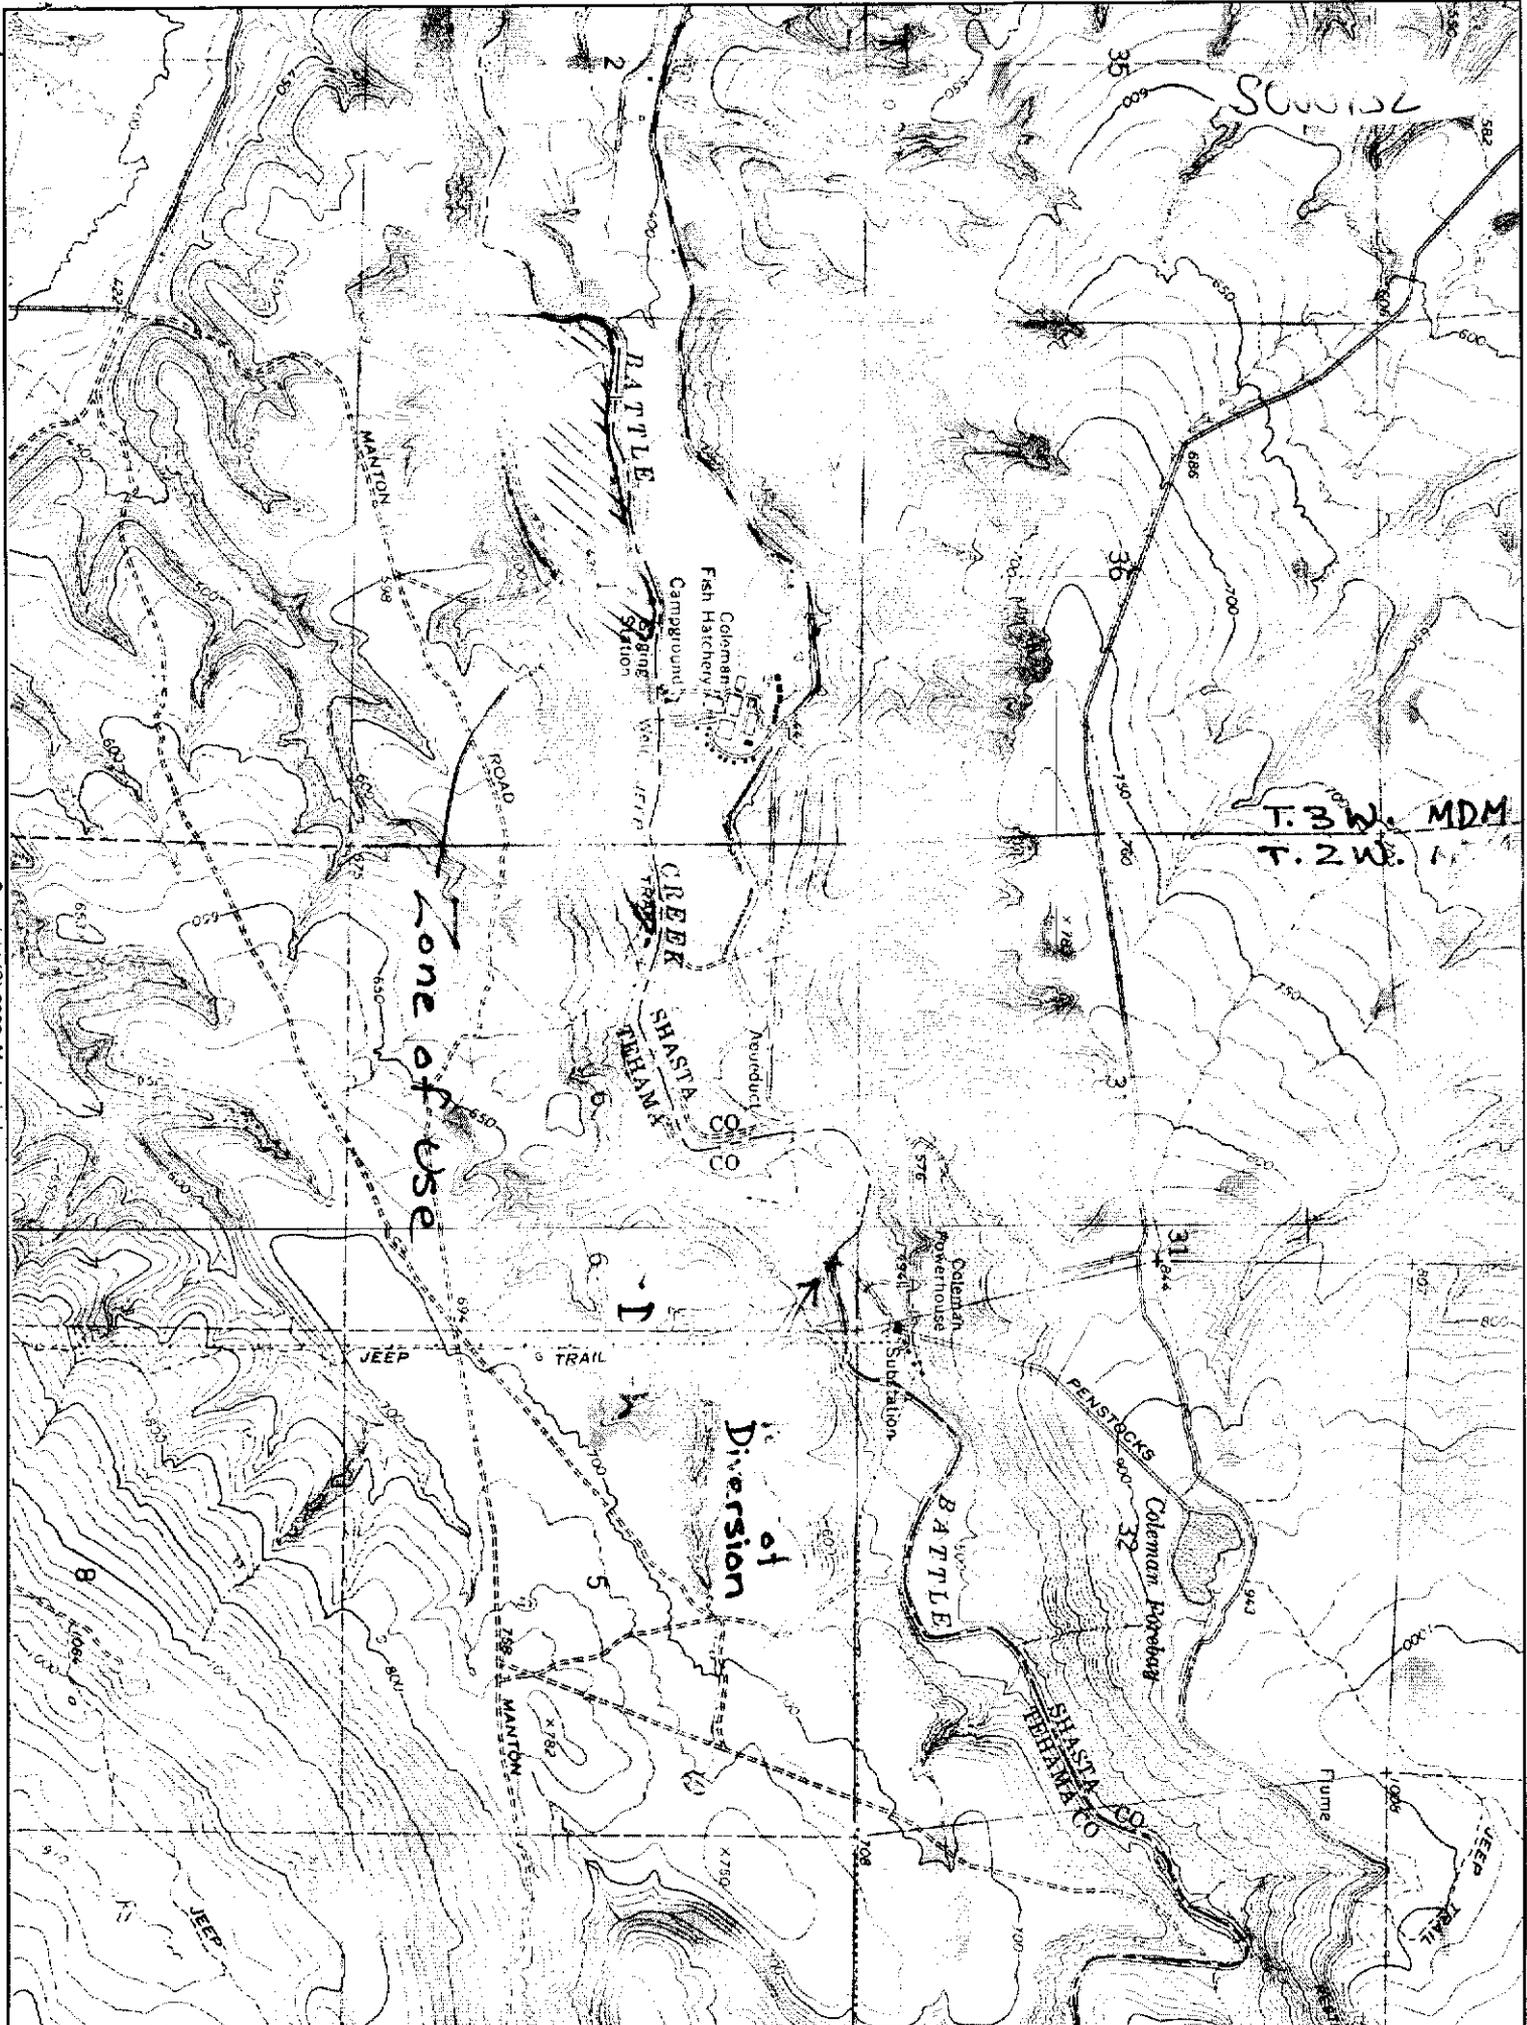

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to 1) store water for later use 2) divert water which originates in a different watershed 3) divert water released from storage, or 4) divert return flows from groundwater use.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

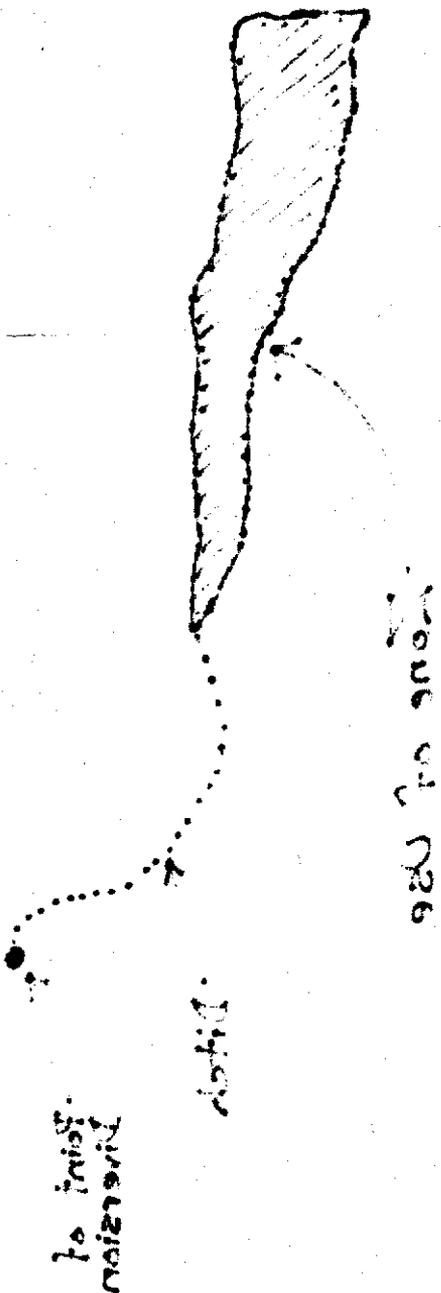

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Right in California and (3) Appropriation of Water in California.

"Appropriation of Water in California"
"Water Rights for Stockpounds Constructed Prior to 1969"
"Information Pertaining to Water Rights in California"
"Statements of Water Diversion and Use"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.
